Mukand installs Centreless Grinder at Thane Plant

By **Stainless Steel World Publisher** - November 25, 2024

Mukand Limited, a leader in Stainless Steel manufacturing proudly announced the successful installation and commissioning of two cutting-edge Centreless Grinding Machines at its plant in Thane, Mumbai. This advanced grinding equipment, designed by the renowned Italian manufacturer Landgraf, brings with it the capability to handle a size range of 10 mm to 50 mm in diameter, setting a new benchmark for precision, efficiency, and high-quality production at the facility.

These Centreless Grinding Machines, known for their exceptional engineering and reliability, come with unique features that set them apart. The machine boasts a robust build that ensures consistent and accurate grinding, contributing significantly to higher production rates without compromising on quality.
