Mumbai: 16 Nov 2024

Mukand Limited, a leader in Stainless Steel manufacturing proudly announced the successful installation and commissioning of two cutting-edge Centreless Grinding Machines at its plant in Thane, Mumbai. This advanced grinding equipment, designed by the renowned Italian manufacturer Landgraf, brings with it the capability to handle a size range of 10 mm to 50 mm in diameter, setting a new benchmark for precision, efficiency, and high-quality production at the facility.

This advanced grinding equipment was capable of processing sizes ranging from 10 mm to 50 mm in diameter and set a new benchmark for precision, efficiency, and high-quality production at the plant. It also allowed the company to better meet the needs of customers, who rely on bright rod applications, such as the industries of automotive, engineering, and construction.
